New! COVID Secure Access For Employees (SAFE)

You don't need to reinvent the wheel when your team goes back to the office. Leverage tools and best practices from other companies to ensure a safe and smooth return.

Safety assessment and planning
Identify who can return to the office and what critical steps need to be taken to set up safety measures in your workplace.

Social distanced office space layout
Plan for altered office space capacity and layout. Identify what areas are off limits or new protocols need to be put in place.

Monitoring health and wellness
Survey employees and visitors entering your space for COVID symptoms.

Back to the office employee training
Ensure colleagues and staff are aware of the new safety regulations for returning to the office. Discover the best training mechanisms for your team.

Registration for returning to the office
Manage on-site employees and enforce state mandated safety guidelines.

Do you have everything covered?

Companies everywhere have put a lot of thought and resource into solving the challenges associated with returning to work.

SquareFoot has provided office space solutions for over 1,500 companies. We can help you to benefit from the thinking of those businesses to keep your employees safe and productive.

Talk to us about how we can help you safely bring your team back to the office.
